## *Local Insight for Gloucestershire County Council*

Local Insight gives you access to interactive maps and reports at small area level. These reports show key social and economic indicators and allow you to compare the area selected to comparator areas.

## *OCSI*

Local Insight is a tool developed by Oxford Consultants for Social Inclusion (OCSI) based on a project developed jointly between OCSI and HACT.

**OCSI** develop and interpret the evidence base to help the public and community organisations deliver better services. A 'spin-out' from the University of Oxford Social Policy Institute, OCSI have worked with more than 100 public and community sector clients at local, national and international level. See [www.ocsi.co.uk](http://www.ocsi.co.uk) for more.

## *About the indicators*

Information published by government as open data – appropriately visualised, analysed and interpreted – is a critical tool for Local Authorities.

OCSI collect all local data published by more than 50 government agencies, and have identified key indicators relevant to local authorities to use in this report and the interactive webtool ([local.communityinsight.org](http://local.communityinsight.org)).

## *How we have identified the “Alvington CP” area*

This report is based on the definition of the “Alvington CP” area created by OCSI for Gloucestershire County Council. We have aggregated data for all the neighbourhoods in “Alvington CP” to create the charts and tables used in this report.

Alongside data for the “Alvington CP”, we also show data for selected comparator areas: Gloucestershire and England.

# Population: Age and gender

4

## What information is shown here?

The information on this page shows the number of people living in Alvington CP. These population figures provide detail of the structure of the population by broad age bands and sex.

The first information box shows the total number of people usually resident in the area, with the male female breakdown. Also shown are numbers by sex and age, and the 'dependency ratio' (the ratio of non-working age to working age population). The final information box shows the population density, based on the total population divided by the area in hectares for the local area

The population pyramid compares the proportion of males and females by five year age bands. The line chart shows how the population is changing over time in Alvington CP and comparator areas. The stacked bar chart, below, shows the age breakdown of the population in Alvington CP and comparator areas by broad age band.

Total Population	Aged 0-15	Working age population	Aged 65+	Dependency ratio
535	65	295	175	0.81
50.7% male; 49.3% female	12.5% (England average = 19.0%)	54.9% (England average = 63.5%)	32.6% (England average = 17.6%)	England average = 0.58

# Population: Ethnicity

5

## What information is shown here?

The information on the right shows the number of people in Alvington CP by ethnicity, based on each person's perceived ethnic group and cultural background.

The information boxes display the number of people who have identified themselves as White British and the number from Black or Minority Ethnic groups (BMEs), as well as the five broad ethnic minority groups (White non-British, Mixed, Asian, Black and other ethnic group). The BME category includes all people who do not state their ethnicity as White British including those who identify as White but of a different ethnic identity.

The final information box shows the proportion of households where not all household members are of the same ethnicity (households with multiple ethnic groups).

The bar chart on the right shows a detailed breakdown of the percentage of people in BME groups by ethnic category.

White British	BME	White-non-British	Mixed
500	5	5	0
98.8% (England average = 79.8%)	1.2% (England average = 20.2%)	0.8% (England average = 5.7%)	0.2% (England average = 2.3%)
Asian	Black	Other ethnic group	Households with multiple ethnicities
0	0	0	0
0.0% (England average = 7.8%)	0.0% (England average = 3.5%)	0.2% (England average = 1.0%)	0.5% (England average = 8.9%)

# Population: Country of birth and household language

6

## What information is shown here?

The information on the right shows the number of people in Alvington CP by country of birth.

The top row information boxes display the number of people in Alvington CP who were born in England and outside the UK as well as the number of people with a UK passport and non-UK passport.

The second row information boxes show the language breakdown of households, identifying the number of people in Alvington CP with one or more household members who cannot speak English.

The bar chart on the right shows a detailed breakdown of the percentage of people in Alvington CP born outside of England by the geographic region of birth.

Born in England	Born Outside the UK	With a UK passport	With a non-UK passport
440	20	385	5
87.2% (England average = 83.5%)	3.6% (England average = 13.8%)	76.3% (England average = 75.8%)	1.8% (England average = 8.8%)
All people in households have English as main language	At least one adult (not all) has English as main language	No adults but some children have English as main language	No household members have English as main language
215	5	0	0
97.7% (England average = 90.9%)	1.4% (England average = 3.9%)	0.0% (England average = 0.8%)	0.9% (England average = 4.4%)

Figure: Population born outside England

Source: Census 2011

## What information is shown here?

The information box shows the number and percentage of migrants in Alvington CP and across England as a whole. A migrant is defined as a person with a different address one year before Census day. The migrant status for children aged under one in households is determined by the migrant status of their 'next of kin' (defined as in order of preference, mother, father, sibling (with nearest age), other related person, Household Reference Person).

The chart on the right shows the population turnover rate. This is calculated as the rate of in or out migratory moves within England and Wales per 1,000 resident population. Figures are based on GP patient register records. The left-hand bars (lighter colour) show people moving *out of* the area – higher values for a particular group indicate that this age-group is more likely to move away from the area. The right-hand bars (darker colour) show people moving *into* the area – higher values for a particular group indicate that this age-group is more likely to move into the area.

The data table on the top right and the chart on the bottom right show the total number of people registering with a National Insurance number who have come from overseas. This is a measure of the number of people who have migrated to the UK from overseas to work, who have registered for a National Insurance number in the local area.

People who have moved address within the last 12 months (Census 2011)	Overseas migrants (National Insurance no. registrations of overseas nationals) (DWP 2015/16)
45	0
8.9% ( average = 12.3%)	0.0% ( average = 2.2%)

## What information is shown here?

The information on the right shows the number of people living in Alvington CP by religious belief, categorised by the six major religions, other religion and no religion.

The bar chart shows the percentage of people in Alvington CP and comparator areas who are of non-Christian religion, displayed by religious belief.

Note, figures in the table and charts do not add up to 100% because they do not include figures for those for who did not reply to the religion question – who were recorded as 'religion not stated' in the census data publication.

Christian	Buddhist	Hindu	Jewish
335	0	0	0
66.4% (England average = 59.4%)	0.4% (England average = 0.5%)	0.0% (England average = 1.5%)	0.0% (England average = 0.5%)

## What information is shown here?

The information in this section shows counts of people who are out of work and receiving workless benefits: Jobseekers Allowance (JSA) claimants and Incapacity Benefit (IB)/Employment Support Allowance (ESA) claimants.

JSA is payable to people under pensionable age who are available for, and actively seeking, work of at least 40 hours a week. IB and ESA are workless benefits payable to people who are out of work and have been assessed as being incapable of work due to illness or disability and who meet the appropriate contribution conditions.

The information boxes on the top right show: the total number of adults (aged 16-64) receiving JSA; the total claiming for more than 12 months; claimants aged 18-24, the number of people receiving 'Incapacity benefits' (IB or ESA); and the number and proportion of 16-24 year olds receiving workless benefits (JSA, IB or ESA).

The line charts on the following page show month on month changes in the proportion of people claiming IB or ESA and the proportion claiming JSA across Alvington CP and comparator areas.

Jobseekers Allowance (JSA) claimants (Aug-16)	JSA claimants claiming for more than 12 months (Aug-16)	Youth unemployment (JSA claimants aged 18-24) (Aug-16)	Female JSA claimants (Aug-16)
00	00	00	00
0.3% (England average = 1.2%)	0.0% (England average = 0.4%)	0.0% (England average = 0.9%)	0.0% (England average = 1.0%)
Male JSA claimants (Aug-16)	Incapacity benefits claimants (Feb-16)	Working age workless benefit claimants (Feb-16)	16-24 year olds receiving workless benefits (Feb-16)
00	15	25	00
0.7% (England average = 1.5%)	4.8% (England average = 6.0%)	8.5% (England average = 11.4%)	0.0% (England average = 4.0%)

## What information is shown here?

The information in this section looks at the prevalence of disability among people living in Alvington CP. There are two measures of disability presented: those claiming Attendance Allowance or Disability Living Allowance.

Attendance Allowance is payable to people over the age of 65 who are so severely disabled, physically or mentally, that they need a great deal of help with personal care or supervision. Disability Living Allowance is payable to children and adults in or out of work who are below the age of 65 and who are disabled, need help with personal care or have walking difficulties. It is a non-means tested benefit, which means it is not affected by income. Disability Free Life Expectancy reports the age people can expect to live to without a disability.

The information boxes on the right show the total number of people receiving Attendance Allowance and Disability Living Allowance across Alvington CP.

Disability Living Allowance claimants	Attendance Allowance claimants
25	20
5.3% of people claim DLA in Alvington CP areas and 4.5% claim in England	12.0% of people claim Attendance Allowance in Alvington CP areas and 14.1% claim in England

## What information is shown here?

The information in this page shows the number of people in receipt of key welfare benefits payable by the Department for Work and Pensions (DWP).

Working age DWP Benefits are benefits payable to all people of working age (16-64) who need additional financial support due to low income, worklessness, poor health, caring responsibilities, bereavement or disability. Housing Benefit (HB) can be claimed by a person if they are liable to pay rent and if they are on a low income and provides a measure of the number of households in poverty. Income Support is a measure of people of working age with low incomes and is a means tested benefit payable to people aged over 16 working less than 16 hours a week and having less money coming in than the law says they need to live on.

The chart on the right shows the change in the proportion of working age people receiving DWP benefits. The charts on the following page show the change in the proportion of Income Support and Housing Benefits claimants and the age breakdown of DWP benefit claimants across Alvington CP and comparator areas.

Working age DWP Benefit claimants (Feb-16)	Female working age benefit claimants (Feb-16)	Male working age benefit claimants (Feb-16)
25	15	10
8.5% (England average = 11.4%)	9.9% (England average = 12.3%)	7.2% (England average = 10.6%)
Income Support (IS) claimants (Feb-16)	Housing Benefit claimants (May-16)	Universal Credit claimants (May-16)

## What information is shown here?

The information on this page looks at overall levels of deprivation across Alvington CP based on the Index of Multiple Deprivation (IMD) 2015. IMD 2015 is the most comprehensive measure of multiple deprivation available. The concept of multiple deprivation upon which the IMD 2015 is based is that separate types of deprivation exist, which are separately recognised and measurable. The IMD 2015 therefore consists of seven types, or domains, of deprivation, each of which contains a number of individual measures, or indicators<sup>1</sup>.

The information boxes on the right show the number of people in Alvington CP living in neighbourhoods ranked among the most deprived 20% of neighbourhoods in England on IMD 2015 and the seven IMD domains. The chart on the right shows the number of people living in neighbourhoods grouped according to level of deprivation. The charts on the following pages show the same information for each of the domains. All neighbourhoods in England are grouped into ten equal sized groups “deciles”; the 10% of neighbourhoods with the highest level of deprivation (as measured in the IMD) are grouped in decile 10, and so on with the 10% of neighbourhoods with the lowest levels of deprivation grouped in decile 1.

## What information is shown here?

This page looks at children in out of work households, children in poverty and children in lone parent households. Children in 'out of work' households, are defined as dependent children living in families where all adults are in receipt of Income Support or income-based Jobseeker's Allowance (IS/JSA). The children in poverty measure shows the proportion of children (aged 0-15) in families in receipt of out of work benefits, or in receipt of tax credits where their reported income is less than 60% median income. Out of work means-tested benefits include: Income-Based Jobseekers Allowance, incapacity benefits and Income Support.

The information boxes on the right show the count of people in each of these three categories in Alvington CP. The bar chart shows the percentage of people in each of these categories across Alvington CP and comparator areas (as a percentage of all children receiving Child Benefit). The line chart shows the year on year change in the proportion of children in out of work households.

Children in 'out of work' households (2014)	Children in lone parent households (2012)	Children in poverty (2014)
05	15	10
8.4% (England average = 15.2%)	15.9% (England average = 27.2%)	13.8% (England average = 20.1%)

## What information is shown here?

The information on this page shows levels of child wellbeing across Alvington CP as measured using the Child Wellbeing Index (CWI). The CWI is a small area index measuring child wellbeing – how children are doing in a number of different aspects of their life. The index covers the major domains of a child's life that have an impact on child wellbeing and that are available for neighbourhoods in England. The CWI is made up of seven domains<sup>2</sup>.

The eight information boxes on the right show the number of people in Alvington CP living in areas ranked among the most deprived 20% of neighbourhoods in England on CWI and the seven domains. The chart on the right shows the number of people living in neighbourhoods grouped according to level of child wellbeing deprivation. All neighbourhoods in England are grouped into ten equal sized groups "deciles"; the 10% of neighbourhoods with the highest level of deprivation (lowest level of child wellbeing) are grouped in decile 10, and so on with the 10% of neighbourhoods with the lowest levels of deprivation grouped in decile 1.

Number of people in Alvington CP living in the most deprived 20% of areas of England by Child Wellbeing Index domain			
Child Wellbeing Index	Children in Need domain	Material Wellbeing domain	Education domain

<sup>2</sup> Material wellbeing - children experiencing income deprivation; Health and disability – children experiencing illness, accidents and disability; Education - education outcomes including attainment, school attendance and destinations at age 16; Crime - personal or material victimisation of children; Housing - access to housing and quality of housing for children; Environment - aspects of the environment that affect children's physical well-being; Children in need – vulnerable children receiving LA services.

## What information is shown here?

The information on this page looks at pensioner groups that may face greater risks or who may have different types of need. There are three measures included: pensioners without access to transport, pensioner loneliness and pensioners in poverty.

Pensioners without access to transport are those with no access to a car or van. The dataset only includes pensioners living in private households.

There are two indicators of pensioner loneliness. The census provides a measure of the proportion of pensioners living alone (defined as households of one pensioner and no other household members). In addition, Age Concern have developed a Loneliness Index (which predicts the prevalence of loneliness amongst people aged 65+). Areas with a value closer to 0 predict a greater prevalence of loneliness amongst those aged 65 and over and living in households compared to areas with a value further away from 0.

Pensioners in poverty are those in receipt of Pension Credit. Pension Credit provides financial help for people aged 60 or over whose income is below a certain level set by the law.

The information boxes present information on the counts of pensioner households or pensioners in each category. The chart on the top right shows the change in the proportion of people receiving Pension Credit across Alvington CP and comparator areas.

The chart on the bottom right compares Loneliness Index scores across Alvington CP and comparator areas - a value closer to 0 predicts a greater prevalence of loneliness amongst those aged 65.

Private pensioner households with no car or van (Census 2001)	Households of one pensioner (Census 2011)	Pension credit claimant (Department for Work and Pensions: Feb-16)

## What information is shown here?

The information on this page looks at the number and proportion of people in three groups with specific needs: mental health issues; households with multiple deprivation; people providing unpaid care.

The figures for people with mental health issues are based on Employment Support Allowance/Incapacity Benefit claimants who are claiming due to mental health related conditions. Incapacity Benefit is payable to persons unable to work due to illness or disability.

Households with multiple deprivation are households experiencing four key measures of deprivation:

- All adult household members have no qualifications
- At least one household member is out of work (due to unemployment or poor health)
- At least one household member has a limiting long-term illness
- The household is living in overcrowded conditions

Informal care figures show people who provide any unpaid care by the number of hours a week they provide that care. A person is a provider of unpaid care if they give any help or support to another person because of long-term physical or mental health or disability, or problems related to old age.

The line chart on the right shows the change in the number of people claiming Incapacity benefit for mental health reasons as a proportion of the working age population and the chart below it includes figures for children and all people providing unpaid care across Alvington CP.

Mental health related benefits (DWP Feb-16)	Households suffering multiple deprivation (Census 2011)	People providing unpaid care (Census 2011)	Unpaid care (50+ hours per week) (Census 2011)
<b>05</b>	<b>00</b>	<b>61</b>	<b>17</b>
2.4% of working age adults (England average = 2.9%)	0.0% (England average = 0.5%)	12.3% (England average = 10.2%)	3.4% (England average = 2.4%)

## What information is shown here?

The information on this page looks at the type of dwelling space people live in. A dwelling space is the accommodation occupied by an individual household or, if unoccupied, available for an individual household, for example the whole of a terraced house, or a flat in a purpose-built block of flats.

The information boxes to the right show the number of people in Alvington CP living in each accommodation type. The chart on the right shows a breakdown of households by accommodation type across Alvington CP and comparator areas.

Detached	Semi-detached	Terraced	Purpose built flat
108	91	14	07
45.6% (England average = 22.3%)	38.4% (England average = 30.7%)	5.9% (England average = 24.5%)	3.0% (England average = 16.7%)

## What information is shown here?

The information on this page looks at the tenure of housing in Alvington CP. The information boxes show the number of households broken down by tenure type and the chart shows the tenure breakdown across Alvington CP and comparator areas.

- 'Owner occupied' housing includes accommodation that is either owned outright, owned with a mortgage or loan, or shared ownership (paying part rent and part mortgage).
- 'Social rented' housing includes accommodation that is rented from a council (Local Authority) or a Housing Association, Housing Co-operative, Charitable Trust, Non-profit housing company or Registered Social Landlord.
- 'Rented from the Council includes accommodation rented from the Local Authority
- 'Housing Association or Social Landlord' includes rented from Registered Social Landlord, Housing Association, Housing Co-operative, Charitable Trust and non-profit housing Company.
- 'Private rented or letting agency' includes accommodation that is rented from a private landlord or letting agency.
- 'Other Rented' includes employer of a household member and relative or friend of a household member and living rent free.

Owner occupied	Owner-occupied: owned outright	Owner-occupied owned: with mortgage or loan
156	89	67
70.3% (England average = 64.1%)	40.1% (England average = 30.6%)	30.2% (England average = 32.8%)
Owner-occupied: shared ownership	Social rented households	Rented from Council
00	31	02
0.0% (England average = 0.8%)	14.0% (England average = 17.7%)	0.9% (England average = 9.4%)
Rented from Housing Association or Social Landlord	Rented from private landlord or letting agency	Other rented dwellings

## What information is shown here?

The information in this section shows measures of housing costs in Alvington CP. Data on house prices is from the Land Registry open data price-paid dataset ([www.landregistry.gov.uk/market-trend-data/public-data/price-paid-data](http://www.landregistry.gov.uk/market-trend-data/public-data/price-paid-data)), which is updated monthly.

## House prices by dwelling type

The information boxes on the right and the chart on the following page show the mean house prices by accommodation type across Alvington CP and comparator areas for four key dwelling types (detached houses, semi-detached houses, flats and terraced houses). The second bar chart on the following page shows the monthly change in the number of transactions and average price across Alvington CP.

## Council tax bands

The data on Council Tax bands shows the number (and proportion) of houses in bands A, B or C (the lowest price bands) and F, G and H (the highest price bands) locally. These price bands are set nationally, so can be used to show how the cost of all local property (not just those properties that have recently been sold) compares with other areas; the chart on the right compares Alvington CP and comparator areas for these Council Tax bands.

Average house price (all types of housing) (Land registry Jun15-May16)	Average house price (detached) (Land registry Jun15-May16)	Average house price (flats) (Land registry Jun15-May16)
£240,500	£333,200	
England average = £300,314	England average = £386,567	England average = £269,473
Average house price (semi-detached) (Land registry Jun15-May16)	Average house price (terraced) (Land registry Jun15-May16)	Households in Council Tax Band A (Valuation Office Agency (VOA) 2015)
£148,333	£147,000	50
England average = £238,292	England average = £233,163	19.8% (England average = 24.6%)
Households in Council Tax Band B (VOA 2015)	Households in Council Tax Band C (VOA 2015)	Households in Council Tax Band F-H (VOA 2015)
59	53	29
23.4% (England average = 19.7%)	21.0% (England average = 21.8%)	11.5% (England average = 9.1%)

## What information is shown here?

The information on this page details indicators of the built environment: overcrowded housing, vacant housing, population density, the size of housing units and the proportion of households lacking central heating.

A household's accommodation is described as 'without central heating' if it had no central heating in any of the rooms (whether used or not). The data also shows breakdowns by tenure. This enables users to compare differences in the proportion of households with inadequate heating supply in the owner occupied, social rented and private rented sectors.

Households are classified as overcrowded if there is at least one room fewer than needed for household requirements using standard definitions. The standard used to measure overcrowding is called the 'occupancy rating' which relates to the actual number of rooms in a dwelling in relation to the number of rooms required by the household, taking account of their ages and relationships. The room requirement states that every household needs a minimum of two common rooms, excluding bathrooms, with bedroom requirements that reflect the composition of the household. The occupancy rating of a dwelling is expressed as a positive or negative figure, reflecting the number of rooms in a dwelling that exceed the household's requirements, or by which the home falls short of its occupants' needs.

Vacant dwellings include housing that was not occupied at the time of the census (excluding second residences or holiday accommodation).

Population density (persons / hectare)	Houses lacking central heating	Overcrowded Housing
0.7	07	06
England average = 4.1	3.2% (England average = 2.7%)	2.7% (England average = 8.7%)
Vacant Dwellings	Dwellings with 2 rooms or fewer	Dwellings with 8 or more rooms
15	05	49
6.3% (England average = 4.3%)	2.3% (England average = 3.7%)	22.1% (England average = 12.7%)

## What information is shown here?

The information on this page shows the number of people living in communal establishments, with breakdowns by the main types.

A communal establishment is defined as an establishment providing managed (full-time or part-time supervised) residential accommodation.

The information boxes on the right show the number and proportion of people in communal establishments by main type of establishment. Medical and care establishments include psychiatric hospital / homes, other hospital homes children's homes, residential care homes, nursing homes managed by the NHS, Local Authority or private organisation; Educational establishments include primarily University halls of residence; Defence establishments include barracks, air bases and naval ships; Other establishments include prison service establishments, bail hostels, hotels, boarding houses or guest houses, hostels and civilian ships.

The chart on the top right provides the same information with associated comparator areas. The chart on the bottom right shows the age breakdown of people living in communal establishments.

All in communal establishments	Medical and care establishments	Education establishments	Defence establishments	Other establishments
00	00	00	00	00
0.0% (England average = 1.8%)	0.0% (England average = 0.7%)	0.0% (England average = 0.7%)	0.0% (England average = 0.1%)	0.0% (England average = 0.1%)

## What information is shown here?

The information on this page and the following shows the level of recorded crime in Alvington CP and comparator areas. This is based on data for individual crime incidents published via the [www.police.uk](http://www.police.uk) open data portal, which has been linked by Local Insight to selected neighbourhoods. Further information on how these crimes and incidents have been categorised, as well as which crimes and incidents have been mapped and why, is available at: [www.police.uk/about-this-site/faqs/#why-are-some-crimes-not-displayed-on-the-map](http://www.police.uk/about-this-site/faqs/#why-are-some-crimes-not-displayed-on-the-map)

The information boxes show counts and rates for the main crime types and anti-social behaviour incidents. The overall crime rate is presented for monthly, quarterly and annual snapshots, with the underlying crime types shown as annual totals.

The line charts to the right and on the following page track monthly change in recorded crime across five key offences (violent crime, anti-social behaviour, burglaries, criminal damage and vehicle crime) across Alvington CP and comparator areas for the last 12 months of data.

<b>All crimes</b> May 2016 monthly total	<b>All crimes</b> Mar-2016 to May-2016	<b>All crimes</b> Jun15-May16
<b>02</b>	<b>06</b>	<b>34</b>
3.7 per 1,000 population (England average = 9.5)	11.2 per 1,000 population (England average = 28.6)	68.1 per 1,000 population (England average = 109.8)
<b>Violent crimes</b> Jun15-May16	<b>Criminal damage incidents</b> Jun15-May16	<b>Anti-social behaviour incidents</b> Jun15-May16
<b>03</b>	<b>01</b>	<b>18</b>
5.6 per 1,000 population (England average = 19.0)	1.9 per 1,000 population (England average = 9.3)	33.6 per 1,000 population (England average = 31.9)
<b>Burglaries</b> Jun15-May16	<b>Robberies</b> Jun15-May16	<b>Vehicle crimes</b> Jun15-May16
<b>02</b>	<b>00</b>	<b>02</b>
8.4 per 1,000 households (England average = 16.4)	0.0 per 1,000 population (England average = 0.9)	3.7 per 1,000 population (England average = 6.5)

## What information is shown here?

The information in this section explores variations in life expectancy and premature mortality. Life expectancy is a measure of the age a person born today can expect to live until, if they experience current mortality rates throughout their life. The chart on the right shows life expectancy at birth for females and males in Alvington CP and comparator areas.

The chart below it shows the standardised mortality ratio for all causes and all ages for Alvington CP. This indicator highlights the ratio of observed to expected deaths (given the age profile of the population). A mortality ratio of 100 indicates an area has a mortality rate consistent with the age profile of the area, less than 100 indicates that the mortality rate is lower than expected and higher than 100 indicates that the mortality rate is higher than expected.

The chart below shows incidence of cancer (with breakdowns for the four most common forms of cancer). The data is presented as an incidence ratio (ratio of observed incidence vs expected incidence given the age profile of the population).

Figure: Prevalence of cancer: Standardised incidence ratio (select causes)

Source: Office for National Statistics (2011-2013)

If an area is above 100, there is a higher incidence of cancer than had been expected. If it is below 100, there is a lower incidence of cancer than expected.

Figure: Life expectancy

Source: Office for National Statistics (2011-2013)

Figure: Standardised mortality ratio (select causes)

Source: Office for National Statistics (2011-2013)

If an area is above 100, there is a higher proportion of deaths than had been expected. If it is below 100, there is a lower proportion of deaths than expected.

## What information is shown here?

The information in this section looks at general levels of health, focusing on the number of people living in neighbourhoods with poor levels of overall health (health deprivation hotspots) and the number of people with a limiting long-term illness.

Health deprivation 'hotspots' are neighbourhoods ranked among the most deprived 20% of neighbourhoods in England on the Indices of Deprivation 2015 Health domain. The domain measures morbidity, disability and premature mortality. All neighbourhoods in England are grouped into ten equal sized groups "deciles"; the 10% of neighbourhoods with the highest level of health deprivation are grouped in decile 10, and so on with the 10% of neighbourhoods with the lowest levels of health deprivation grouped in decile 1.

The chart on the right shows the number of people in Alvington CP living in each health decile. The charts below shows the proportion of residents in Alvington CP with a limiting long-term illness by age.

Number of people living in health deprivation 'hotspots' (Indices of Deprivation 2015)	People with a limiting long-term illness (Census 2011)	People aged 16-64 with a limiting long-term illness (Census 2011)	Babies born with a low birth weight (ONS 2013)
0	100	30	17
-	19.8% (England=17.6%)	10.5% (England=12.8%)	3.4% (England average = 2.4%)

## What information is shown here?

The information in this section looks at admissions to hospital by main health condition. The chart on the top right shows emergency admissions to hospital across Alvington CP and comparators. The chart on the bottom right shows elective in-patient hospital admissions (admissions that have been arranged in advance).

The data are presented as standardised ratios; a ratio of 100 indicates an area has an admission rate consistent with the national average, less than 100 indicates that the admission rate is lower than expected and higher than 100 indicates that the admission rate is higher than expected.

Figure: Emergency hospital admissions: Standardised ratio (select causes)

Source: Hospital Episode Statistics, Information Centre for Health and Social Care, Office for National Statistics (2011-2013)

If an area is above 100, there is a higher proportion of admissions than had been expected. If it is below 100, there is a lower proportion of admissions than expected.

Figure: Elective hospital admissions: Standardised ratio (select causes)

## What information is shown here?

The information on this page looks at lifestyle behaviours of people living in Alvington CP. Lifestyle behaviours are risk factors which play a major part in an individual's health outcomes and will have varying physical and psychological consequences.

The chart on the top right shows the healthy eating levels (consumption of five or more portions of fruit and vegetables a day among adults) in Alvington CP. It also shows smoking prevalence and levels of binge drinking in these areas. Binge drinking is defined as the consumption of at least twice the daily recommended amount of alcohol in a single drinking session (8 or more units for men and 6 or more units for women).

The chart on the bottom right shows the percentage of people children (in reception year and year 6) and adults classified as obese in Alvington CP. People are considered obese when their body mass index (BMI) a measurement obtained by dividing a person's weight by the square of the person's height, exceeds 30 kg/m<sup>2</sup>.

## What information is shown here?

The information on this page shows the outcomes of children in the Early Years Foundation Stage (EYFS), a series of tests measuring children's progress in terms of Personal, Social and Emotional Development (PSED) and Communication, Language and Literacy (CLL). These are typically 5 year old pupils; however a minority of slightly older and younger pupils may have been assessed.

The new Early Years Foundation Stage Profile requires practitioners to make a best fit assessment of whether children are emerging, expected or exceeding against each of the new 17 Early Learning Goals (ELGs). Children have been deemed to have reached a Good Level of Development (GLD) in the new profile if they achieve at least the expected level in the ELGs in the prime areas of learning (personal, social and emotional development; physical development; and communication and language) and in the specific areas of mathematics and literacy. These are 12 of the 17 ELGs. The Department for Education has also introduced a supporting measure which measures the total number of points achieved across all 17 ELGs and reports the average of every child's total point score.

The chart on the right shows the percentage of pupils achieving 17 ELGs, the average point score at Early Years Foundation stage and the percentage of pupils achieving a good level of development.

Figure: Early years foundation stage profile  
Source: Department for Education (2013-2014)

## What information is shown here?

The chart on the top right shows the education levels of pupils in Alvington CP, showing the examination results at Key Stage 1 (tests set at aged 7) Key Stage 2 (tests set at aged 11) and Key Stage 4 (GCSEs).

The figures show the Average Point Score of pupils from each of the Key Stage examinations. This adjusts for high achieving pupils as well as pupils achieving expected levels.

The chart on the top right shows Average Point Score (across all examinations) per pupil at Key Stage 1 and Key Stage 2. The chart on the bottom right compares the gap in Average Point Score at Key Stage 4 (GCSE) per pupil between Alvington CP and the national average over time. The gap is measured as the point difference against the England average. Areas with a score of greater than 1 are performing better than the national average, while areas with a score of less than 1 are performing below.

Figure: Pupil attainment at Key Stage 1 and Key Stage 2

Source: Department for Education (2013-2014)

■ Alvington CP ■ Gloucestershire ■ England

Figure: Gap in pupil attainment at Key Stage 4 (difference from the national average)

Source: Department for Education

Scores above 0 show an improvement on the National average. Average Point Score is made up of all GCSE examinations sat, with a point score of 58=A\*, 52=A, 46=B, 40=C, 34=D, 28=E, 22=F, 16=G.

## What information is shown here?

The information on this page looks at three types of income category: households below the poverty line; average household income; and households living in fuel poverty. Households are defined as in 'poverty' if their equivalised income (after size of household is taken into account) is below 60% of the median income (after housing costs). In 2007/08 a household's weekly net equivalised income would need to be below £199 for it to be classified as in poverty. Fuel poverty is said to occur when in order to heat its home to an adequate standard of warmth a household needs to spend more than 10% of its income on total fuel use.

The information boxes on the top right provide an estimate of the number of households in Alvington CP below the poverty line and an estimate for the number of households in fuel poverty.

The chart on the right shows the average weekly household income estimate (equivalised to take into account variations in household size) across Alvington CP and comparator areas (before and after housing costs).

Households below 60% of the median income, after housing costs (Office for National Statistics 2007/08)	Weekly household income, after housing costs (Office for National Statistics 2011/12)	Households living in 'Fuel Poverty' Department for Energy and Climate Change (2014)
21.9	£360	50
England Average = 21.5%	England Average = £423	20.5% of households (England = 10.6%)

## What information is shown here?

The information on this page shows breakdowns of the main industry sectors people in Alvington CP are working in, and their occupational status.

The data in the top information boxes shows the three largest employment sectors for residents in the local area, also the number and percentage of employed people working in each of these sectors. The lower information boxes and the chart on the right show the numbers of residents in Alvington CP by type of occupation (e.g., managers, professional, administrative).

Largest employment sector		Second largest employment sector		Third largest employment sector	
Education		Retail		Health & social work	
25 employees (12% of 235 of people in employment)		30 employees (13% of 235 of people in employment)		30 employees (12% of 235 of people in employment)

## What information is shown here?

The information on this page shows the number of vacant jobs in Alvington CP compared against the overall unemployment levels in the area.

The 'Unemployment to 'Available Jobs' ratio, shown in the information box on the right and the line chart below is the total number of people claiming unemployment benefit (Jobseekers Allowance) divided by the total number of job vacancies notified to Jobcentre Plus expressed as a ratio.

The bar chart on the bottom right shows month-on-month changes in the number of job vacancies notified to Jobcentre Plus, that are located in the area covering Alvington CP (based on postcode location of the job). Note this data was last updated by Jobcentre Plus for November 2012.

*What information is shown here?*

The information in this section shows the concentration of 'local business units' in Alvington CP. 'Local business units' are counts of businesses based on the location of an operational unit. Though larger businesses such as supermarket chains may have their head office in a large city, these figures measure all subsidiaries of that larger enterprise based on where subsidiaries are located. The figures cover all business eligible for VAT (1.7 million businesses in the UK are registered for VAT). These businesses are categorised into 16 broad industry groups derived from the Standard Industrial Classification (UKSIC (2003)).

The information boxes show the three largest industry groups for businesses based in Alvington CP. The line chart shows the change in the number of businesses per head of the population across Alvington CP over time. The bar chart shows the count of local business broken down by size of business. Businesses are broken down into four employment size bands based on the number of paid employees (0-4, 5-9, 10-19 and 20+ paid employees).

## What information is shown here?

The information on this page shows two measures of access to the internet. The first measure shows information on broadband take-up, speeds and availability. It has been produced by Ofcom and contains data provided by communications providers. The data shows the average broadband line speed in Alvington CP and the proportion of postcodes in Alvington CP which contain homes with low broadband speeds (less than 2 Mbit/s).

The chart on the right shows the proportion of people who responded to the 2011 Census online, compared with the proportion that filled in the Census form on paper in Alvington CP. This is a proxy measure of digital engagement with typically areas with a high proportion of online Census responses more likely to be digitally engaged than those in areas with low levels of online responses.

Postcodes containing homes with low broadband speeds (less than 2 Mbit/s)	Average broadband speed (Mbit/s)
07	6.13
38.9% (England average = 41.0%)	England average = 17.57

## What information is shown here?

The information on this page looks at the characteristics of neighbourhoods across Alvington CP as defined using the Output Area Classification (OAC). OAC classifies every area in the country based on a set of socio-demographic characteristics, to provide a profile of areas to identify similarities between neighbourhoods. The information boxes on the right show the number and proportion of neighbourhoods in Alvington CP that fall within the eight supergroup categories, detailed below. The chart on the right shows the proportion of areas falling within supergroup categories across Alvington CP and comparators.

<b>Rural residents</b>	Rural areas, sparsely populated, above average employment in agriculture, higher number owning multiple cars, an older married population, a high provision of unpaid care and an above average number of people living in communal establishments.
<b>Cosmopolitans</b>	Residing in densely populated urban areas, high ethnic integration, high numbers of single young adults without children including students, high public transport use, above average qualification levels
<b>Ethnicity central</b>	Concentrated in Inner London and other large cities, high ethnic diversity, high proportion of rented accommodation, high proportion of people living in flats, low car ownership.
<b>Multicultural metropolitans</b>	Concentrated in larger urban conurbations in the transitional areas between urban centres and suburbia, high proportion of BME groups, high proportion of families.
<b>Urbanites</b>	Predominantly in urban areas with high concentrations in southern England. More likely to live in either flats or terraces that are privately rented.
<b>Suburbanites</b>	Located on the outskirts, in areas with high owner occupation, high numbers of detached houses, low unemployment, high qualifications and high car ownership.
<b>Constrained city dwellers</b>	Higher proportion of older people, households are more likely to live in flats and to rent their accommodation, and there is a higher prevalence of overcrowding, higher proportion of people in poor health, lower qualification levels and high unemployment
<b>Hard-pressed living</b>	Mostly on the fringe of the UK's urban areas, particularly in Wales and the North of England. High levels of people in terraced accommodation, high unemployment, low ethnic diversity, high levels of people employed in manufacturing

Rural residents	Cosmopolitans	Ethnicity central	Multicultural metropolitans
315	0	0	0
62.3% (England average = 10.5%)	0.0% (England average = 4.9%)	0.0% (England average = 6.6%)	0.0% (England average = 15.3%)
Urbanites	Suburbanites	Constrained city dwellers	Hard-pressed living
0	0	0	191
0.0% (England average = 18.6%)	0.0% (England average = 20.8%)	0.0% (England average = 6.2%)	37.7% (England average = 17.2%)

## What information is shown here?

The information on this page shows different measures of people's satisfaction with their neighbourhood and their sense of community cohesion in the neighbourhood. It also shows different measures of people's participation in volunteering and political decision making in the local area. In addition the information box on the far bottom right shows the number of active charities per 1,000 population.

Figures are self-reported and taken from the Place Survey. The Place survey is collected at Local Authority level so does not include neighbourhood information, and ceased nationally in 2008 so is increasingly out of date.

Figure: Indicators of community strength

Source: Place Survey (2008)

"People from different backgrounds get on well together in the local area"	80%	(England = 76%)	People who feel that they belong to their neighbourhood	67%	(England = 58%)	People who are satisfied with local area as a place to live	83%	(England = 79%)	Aged 65+ "satisfied with both home and neighbourhood"	85%	(England = 83%)
People involved in decisions that affect the local area in the past 12 months	15%	(England = 14%)	People who believe they can influence decisions in their local area	25%	(England = 29%)	People who have given unpaid help at least once per month over the last 12 months	24%	(England = 23%)	Active charities	4.1 per 1,000 population	(England = 2.6 per 1,000)

## What information is shown here?

The information on this page shows background concentrations from four air pollutants: nitrogen dioxide, benzene, sulphur dioxide and particulates. The air quality data was collected for 2012 on a 1km grid and obtained from the UK National Air Quality Archive for use in the Indices of Deprivation 2015. A higher score indicates a higher concentration of the pollution with a score of greater than 1 indicating that the levels of pollution exceed national standards of clean air.

Benzene concentrations	Nitrogen Dioxide concentrations	Particulates (PM10) concentrations	Sulphur Dioxide concentrations
0.06	0.2	0.4	0.03
(England average = 0.09)	(England average = 0.5)	(England average = 0.4)	(England average = 0.05)

## *How we have identified the “Alvington CP” area*

This report is based on the definition of the “Alvington CP” area, created by OCSI based on data provided by the Gloucestershire County Council team. We have created a weighted lookup from Output Areas to each parish, based on the GIS boundaries of each of the parishes, and Ordnance Survey AddressBase data on residential addresses, provided by the council team to OCSI.

For each Output Area, this weighted lookup identifies the proportion of residential properties that are located in the parish. We have used this lookup to create aggregated data for the parishes in Gloucestershire; this data is then presented in this report.

Alongside data for the “Alvington CP” neighbourhood we also show data for selected comparator areas.

## *Data in this report is based on regularly updated open data published by government sources*

All the data in this report is based on open data published by more than 50 government agencies, collected and updated by OCSI on weekly basis. Data is updated on regular basis, with the reports and mapped data on the website reflecting the latest available data.

Details of the individual datasets are provided on the pages where the data is presented, with information on dates and sources presented alongside the charts and tables. On the website, information about each source is available on the popup “About the indicator” link at the top-right of the map.

## *Standard geographies used in this report*

**Super Output Areas (SOAs):** SOAs are a statistical geography created for the purpose of presenting data such as the Census, Indices of Deprivation, and other neighbourhood statistics. There are two layers to the SOA geography: ‘lower layer’ (LSOA) and ‘middle layer’ (MSOA). SOAs are designed to produce areas of roughly equal population size - 1,500 people for LSOAs and 7,200 for MSOAs. The majority of data used in this report is based on LSOA boundaries; of which there are 32,844 in England (there were changes to around 4% of LSOA definitions in Census 2011).

**Output Areas (OAs):** OAs are a more detailed statistical geography than SOAs, with each covering around 300 people, or 120 households. There are 171,372 OAs in England (there were changes to around 5% of OA definitions in Census 2011).

**Wards:** A small number of datasets are published at ward level. These are on average four times larger than LSOAs. Data is less detailed than LSOA level datasets and wards vary greatly in size, from less than 200 residents (Isles of Scilly), to more than 36,000 residents (in Sheffield).

**Local Insight** gives you the data and analysis you need to ensure your services are underpinned by the best possible knowledge of local communities, leveraging the power of information right across your organisation, from high-level visualisations for Board level to detailed reports on local neighbourhoods. Saving you time and money, Local Insight gives you the most relevant and up-to-date data on the communities where you work, with no need to invest in specialist mapping and data staff, consultancy or software. See <http://local.communityinsight.org/> for more information.

Local Insight is developed by OCSI, based on a project that was jointly developed by HACT and OCSI.

**OCSI** work with public and community sector organisations to improve services. We turn complex datasets into engaging stories; making data, information and analysis accessible for communities and decision-makers. See [www.ocsi.co.uk](http://www.ocsi.co.uk) for more information.
